1.0 Introduction to TOTAL Scorecard

1.1 Purpose of TOTAL Scorecard Developer's Guide

The TOTAL Scorecard Developer's Guide provides the necessary information to establish an interface between the FHA's TOTAL Scorecard and an Automated Underwriting System (AUS). This document is primarily aimed at the software development and maintenance staff supporting an AUS. The document contains the following sections:

- Section 1 - Introduction to TOTAL Scorecard includes an overview of TOTAL Scorecard.
- Section 2 - Getting Started describes communication protocols, tips on building your TOTAL Scorecard interface, and security requirements.
- Section 3 - Interface File Descriptions details XML file formats and error handling.
- Appendices – including the Scorecard Data Elements, Error Codes and the DTD.

The purpose of this guide is to provide technical guidance to Automated Underwriting System (AUS) providers who are or desire to be interfaced with FHA's TOTAL Mortgage Scorecard. This guide does not provide or imply credit policy guidance for FHA insuring.

For agency credit policies refer to:

Handbook 4000.1, FHA Single Family Housing Policy Handbook
<https://www.hud.gov/sites/documents/40001HSGH.PDF>

HUD Mortgagee Letters

For agency policies pertaining to the use of FHA's TOTAL Mortgage Scorecard, refer to:

Handbook 4000.1, FHA Single Family Housing Policy Handbook, Section II. A. 4. Underwriting the Borrower Using the TOTAL Mortgage Scorecard (TOTAL)

1.2 Overview of TOTAL Scorecard

TOTAL Scorecard is a transaction-based system. The steps below describe the processing of loan information from the lender's AUS, to the TOTAL Scorecard, and back to the lender. These steps must be performed for each transaction processed through the TOTAL Scorecard.

1. Loan information is entered into the lender's AUS.
2. The lender requests an underwriting decision from the AUS.
3. The AUS pulls the borrower's credit and applies eligibility rules.
4. The AUS calls the TOTAL Scorecard
5. The AUS examines the TOTAL Scorecard results along with other criteria to provide an underwriting decision.

NOTES:

2.0 Getting Started

This section is designed to assist AUS developers (management and staff) in planning the organization's interface to the TOTAL Scorecard.

The following topics are outlined in this section:

- **Things to Consider** - There are decisions that the AUS developer must take into consideration when developing the TOTAL Scorecard interface.
- **Building the TOTAL Scorecard Interface** - There are steps that the AUS developer must follow with regard to implementation of these requirements, whether it be for initial or subsequent use. Most steps are likely to already be part of your system development process.
- **Security Requirements and Recommendations** - There are general rules and requirements that apply to the AUS developer when interfacing with the TOTAL Scorecard which directly impact system and data-related security.

2.1 Things to Consider

This section provides some key points for your consideration in the planning and development of the TOTAL Scorecard interface.

2.1.1 Interface Data File Formats

The TOTAL Scorecard uses Extensible Markup Language (XML). XML uses tags that define the data elements. The TOTAL Scorecard WSDL and Schemas are included in Appendix D in this document. The TOTAL Scorecard call is made using Simple Object Access Protocol (SOAP) Web Services. For further information regarding interface file descriptions, refer to section 3 of this manual. The SOAP call will be secured via SSL using HTTPS.

2.1.2 Communications Protocol

The communications protocol for TOTAL Scorecard is SOAP. The SOAP call to the TOTAL Scorecard will be secured using HTTPS.

The HTTPS communications protocol provides two layers of data protection.

- The HTTPS communications protocol requires that a certificate reside on the server. This certificate must be issued by a trusted certificate authority. This ensures that the user is communicating with the TOTAL Scorecard and not some third party trying to spoof the TOTAL Scorecard's IP address.
- The HTTPS protocol encapsulates standard Hyper Text Transfer Protocol (HTTP) within the Secure Socket Layer (SSL). SSL is a universally accepted mechanism for securing data in transit across the Internet. SSL provides a very secure data encryption mechanism.

2.2 Building the TOTAL Scorecard Interface

2.2.1 Data Mapping

The first aspect in developing of the TOTAL Scorecard interface is reviewing the data and formats required by the TOTAL Scorecard. The AUS developer must map each of the TOTAL Scorecard XML data elements to the corresponding data element(s) in the AUS. A field-by-field matrix is the suggested method for accomplishing this data mapping.

Through the data mapping process, you are able to identify:

- **Data elements that are currently available within your system** - This set of data elements should not require a significant

effort in the process of developing the interface.

- **Data elements that are available but values must be re-mapped or calculated** - These data elements require re-mapping of the values within your system to the values that TOTAL Scorecard requires.
- **Data elements that are unavailable in your system** - The AUS must be modified to capture these additional data elements, utilizing new or existing screens.

2.3 Security Requirements and Recommendations

TOTAL Scorecard's security requirements and recommendations adhere to the standards that have been established by the Automated Data Processing Security Office at HUD. All TOTAL Scorecard transactions are required to have the following:

- **User ID** – up to ten alphanumeric characters; and
- **Password** – up to ten alphanumeric characters.

User IDs and passwords are sent as part of the SOAP Header. User IDs will be issued to partners as they are ready to begin developing their calls to the TOTAL Scorecard.

3.0 Interface File Descriptions

The AUS interfacing with the TOTAL Scorecard must be able to build TOTAL Scorecard standard XML data for a given Scorecard request. This XML will be transmitted via a SOAP request. This section details the format of both the SOAP Request and Response Objects.

The SOAP Request and Response objects are defined by the XML Schema and Web Service Definition Language (WSDL) shown in Appendix D.

Please note: All data must be properly represented in XML. There are five entity reference substitutions which are shown below. If any data is submitted that contains any of these characters, the proper entity reference should be included in the XML or that field must be identified as unparsed character data.

Entity	Character	Entity Reference
Ampersand	&	&
Greater Than Sign	>	>
Less Than Sign	<	<
Quote	“	"
Apostrophe	‘	'

For example, if a data field contained the following value “A & B Construction” the data would have to be represented as such:

```
<mytag>A &amp; B Construction</mytag>
```

Or

```
<mytag> <![CDATA[A & B Construction]] </mytag>
```

Many credit reports contain these characters. It is a good practice to automatically identify all credit reports as unparsed character data.

E.4 TOTAL Scorecard – Release of Version 1.2 - Implementation Date Dec 1, 2004

<u>Name</u>	<u>Appendix A - position</u>
Version	95 (input)
Version	21 (output)

E.5 TOTAL Scorecard – Release of Version 2.0 - Implementation Date July 14, 2008

December 3, 2007 published updated documentation for this implementation.

Version 2.0 will collect three new required fields: Down Payment, Base Mortgage Amount, and Base LTV. Please see the Input Fields table in Appendix A (page A-9) for field definitions and the input DTD in Appendix C. Three new error codes were added to correspond to these new fields. Please see Appendix B (page B-2) for error codes.

In Version 2.0, two previously optional fields will be required. The two required fields are First Time Home Buyer and Counsel Type. Two new error codes were added to correspond to these newly required fields. Please see Appendix B (page B-2) for error codes.

Version 2.0 will allow for a new value in the Counsel Type field. This new value will be “D” which means the borrower was counseled by a HUD approved counseling agency.

Version 2.0 will collect three new optional fields: Manufactured Housing, Number of Living Units, and ARM Type. Please see the Input Fields table in Appendix A (page A-9) for field definitions and the input DTD in Appendix C.

Version 2.0 returns three new fields: Upfront MIP Factor, Annual MIP Factor, and Higher Mortgage Insurance Premium Indicator. Please see the Output Fields table in Appendix A (page A-10) for field definitions and the output DTD in Appendix C (page C-2). Please note: Only a zero will be returned for the Higher Mortgage Insurance Premium Indicator at this time. This is a place holder for future use.

Version 2.0 returns a new review rule (07). Please see the Output Fields table in Appendix A (page A-9) for Review Rule definitions.

Removed 4 Scorecard Error Codes from Appendix B

- 200: FICO Score numbers for SSN2 must be 0 when SSN2 not entered
- 210: FICO Score numbers for SSN3 must be 0 when SSN3 not entered
- 220: FICO Score numbers for SSN4 must be 0 when SSN4 not entered
- 230: FICO Score numbers for SSN5 must be 0 when SSN5 not entered

Modified the Appraised Value and Sales Price field size and Scoreable Criteria.
 Modified the Loan Amount, Unpaid Principle Balance and Mortgage Basis field size.

Name	Appendix A – position
Appraised Value	2
Loan Amount	5
Sales Price	9
Unpaid Principle Balance	79
Mortgage Basis	80

Modified the Error Messages for Appraised Value (305) and Sales Price (330) from Appendix B.

Modified the definition for Loan Purpose

Version 2.0 added two new values for Gift Letter Source (14 and 15) and removed one value (02).

Version 2.0 added a new value for Secondary Financing Source (04).

E.6 TOTAL Scorecard – Update to Version 2.0 - Implementation Date July 14, 2008

May 13, 2008 published updated documentation for this implementation

Added new input field refinance_type. Please see the Input Fields table in Appendix A (item 102) for field definition and the input DTD in Appendix D.

Modified the Monthly payment, including Principal, Interest, Taxes, and Insurance, Underwriting P&I, and Contract P&I field size and Scorable Criteria.

<u>Name</u>	<u>Appendix A – position</u>
Monthly payment	2
Underwriting P&I	21
Contract P&I	22

Modified the Error Messages for Monthly payment, including Principal, Interest, Taxes, and Insurance (315) and Underwriting P&I (375) from Appendix B.

E.7 TOTAL Scorecard – Release of Version 2.1 - Implementation Date October 1, 2008

September 2, 2008 published updated documentation for this implementation.

Version 2.1 added a new value for Refinance Type. In the Definition for the Input fields table in Appendix A (item 102), this new value will be “H” which means the borrower is applying for a HOPE loan.

In Version 2.1, three previously required fields will be optional. The three optional fields are Down Payment, Base Mortgage Amount and Base LTV.

Removed 3 Scorecard Error Codes from Appendix B

- 425: DOWN PAYMENT AMOUNT IS NOT VALID
- 430: BASE MORTGAGE AMOUNT IS NOT VALID
- 435: BASE LTV IS NOT VALID

Modified the Down Payment, Base Mortgage Amount, and Base LTV Scoreable Criteria.

<u>Name</u>	<u>Appendix A – position</u>
Down payment	96
Base Mortgage Amount	97
Base LTV	98

E.8 TOTAL Scorecard – Update to Version 2.1 - Implementation Date Sept 1, 2009

August 3, 2009 published updated documentation for this implementation.

Modified allowable values for the “refinance_type” field. Added the following allowable values:

- “H” - HOPE For Homeowners
- “S” - Streamline Refinance

Removed “14 - Nonprofit/Religious/Community - Seller Funded” as an allowable value for the “gift_source” field.

E.9 TOTAL Scorecard – Release of Version 2.2 - Implementation Date October 4, 2010

May 12, 2010 published updated documentation for this implementation.

Modified to reference Version 2.2 which was implemented on April 3, 2010 to support MIP Factor changes described in Mortgagee Letter 2010-02.

No interface changes were made as part of this modification.

E.10 TOTAL Scorecard – Release of Version 2.3 - Implementation Date October 4, 2010

August 19, 2010 published updated documentation for this implementation.

Added new input field Sponsored Originator EIN. Please see the Input Fields table in Appendix A (item 103) for field definition and the input DTD in Appendix C.

Modified the definition for Lender ID. Please see Input Fields table in Appendix A (item 93) for new field definition.

Added 4 Scorecard Error Codes in Appendix B

- 385 Either Lender ID or Sponsored Originator EIN is required
- 386 Both Lender ID and Sponsored Originator EIN not allowed. Please submit either Lender ID or Sponsored Originator EIN.
- 387 Sponsored Originator EIN is invalid. Sponsored Originator EIN must be nine numeric digits.

388 Sponsored Originator EIN is invalid. Sponsored Originator EIN must be in the CHUMS Sponsored Originator list.

Added new review rule (08) for Version 2.3. Please see the Review Rule definitions in the Output Fields table in Appendix A. The new review rule is needed for FICO and LTV processing.

E.11 TOTAL Scorecard – Update to Version 2.3 - Implementation Date Sept 24, 2010

Modified definition for error codes 001 and 999. No functionality with TOTAL Scorecard was modified.

The definitions for two error codes were modified. Please see Appendix B.

The old definitions were:

- 001 - Data in AUS system to calculate score is not complete
- 999 - AUS system unable to score loan with data provided

The new definitions are:

- 001 - The TOTAL Scorecard server was not set up correctly
- 999 - The TOTAL Scorecard experienced an unexpected error while processing. One example that would cause this to occur is if the Web server was unable to open a connection to the database server. This should be very rare.

E.12 TOTAL Scorecard – Release of Version 2.4 - Implementation Date April 16, 2011

February 17, 2011 published updated documentation for this implementation.

Modified to reference TOTAL Scorecard Version 2.4 which will be implemented on April 16, 2011 to support Annual MIP Factor increases as described in Mortgagee Letter 2011-10.

No interface changes were made as part of this modification.

E.13 TOTAL Scorecard – Release of Version 2.5 - Implementation Date March 4, 2012

December 1, 2011 published updated documentation for this implementation.

The scoreable criteria was changed on nine fields. These fields are currently optional. They will be required beginning July 21, 2012. These fields are:

Borrower Paid Closing Costs	65	borr_clsg_costs
Current Housing Expenses	67	monthly_expense
Gift Letter Amount	70	gift_amt
Gift Letter Source	71	gift_source
Required Investment	73	req_invest
Total Closing Costs	78	clsg_costs
Total Fixed Payment	82	total_fixed
Seller Concessions	90	seller_concessions
Down Payment	96	down_payment

The Source column in Appendix A was changed on the following six fields to remove all references to form 92900-WS.

Assets After Closing	3	assets_after_clsg
Loan-To-Value Ratio	17	ltv
Front-End Ratio	18	front_end_ratio
Back-End Ratio	19	back_end_ratio
Borrower Paid Closing Costs	65	borr_clsg_costs
Total Closing Costs	78	clsg_costs

One new input field was added. This field is currently optional. It will be required beginning July 21, 2012.

Condominium Indicator	104	condo_ind
-----------------------	-----	-----------

Three new Review Rules were added (Output data item #3). These review rules will be implemented beginning July 21, 2012.

- 09 – Current Housing Expense exceeds Monthly Income.
- 10 – Gift Amount exceeds 150% of Required Investment.
- 11 – Seller Concession Amount exceeds 6% of Sale Price.

Four new Output fields were added.

County Limits (1 Unit)	26	limit1
County Limits (2 Unit)	27	limit2
County Limits (3 Unit)	28	limit3
County Limits (4 Unit)	29	limit4

Added 12 Scorecard Error Codes in Appendix B

Error Code	Error Message
